**We build our benches & bleachers to the highest standards. Listed below are some of the differences by others who may be listing their benches & bleachers as comparable to ours.**

1. Frames - Ours are 100% aluminum angle. Be careful of those quoting "galvanized, steel angle iron" as equal.
2. Seat Planks - Ours are 100% anodized aluminum with a minimum wall thickness of .078 in. A thinner walled unit does not have the strength or support.
3. End Caps - Ours are constructed of fiber reinforced polypropylene. No sharp edges to snag clothing or skin.

4. Indoor Use - Our Tip N' Roll units come with rubber leg protectors so they can be used indoors or out. Be careful of those units using steel vs aluminum. In a "tip-over" fashion, steel could damage your gym floor or cause personal injuries.

**Don't be fooled by a low price. Our manufacturing team has been in this business for 30 years. If you see bids or quotes that "seem too good to be true" - they are. Respectable manufacturers purchase aluminum at the same prices. Anyone offering to deliver product at 30% less is not matching specs.**

The GEAR Pro-Tec Z-Cool® pads provide Ultra-Light Protection that's lighter than traditional pads. Our patented moisture transfer technology provides unsurpassed cooling and superior performance.

## TECHNOLOGY

### HOW Z-COOL® WORKS

#### 1. ACTIVE AIR CIRCULATION:

3-D Air Flow Brock® Foam allows air to circulate through the pad in three dimensions. As sweat coats the surface area of the waterproof foam beads, the airflow actively accelerates evaporation which is the key to body temperature cooling and post-game drying time.

#### 2. IMPACT ENERGY DISPERSION:

Z-Cool® shoulder pads feature Brock® Foam giving them an advantage over the standard open cell foam. Upon impact, each bead in the Brock Foam padding dissipates and redistributes energy waves to the connected adjacent beads.

#### 3. ENHANCED PERFORMANCE:

The benefits of Z-Cool® technology provide athletes with an extra edge on the competition. A perfect combination of materials and engineering to cool the athlete's body by wicking away perspiration and protecting athletes with superior impact dispersion. An ultra-light design that allows athletes at all levels to perform at their very best... in the very best.

AC notch-out with cradle pad provides Acromioclavicular joint protection. No direct pressure on AC joint.

Adjustable cap system follows arm and shoulder movement allowing for full range of motion and additional protection.

Adjustable and removable waterproof Air-Release® clavicle pads provide a customized fit for maximum comfort and safety.

**Windscreen Measuring Tips**

It is very important to be very specific in making custom measurements. One cannot take too many notes and be too detailed when making measurements. The following tips are suggestions to help you in your measurement process.

1. For accurate measurements, make sure that the tape measure is stretched tight so that there is not any slack in the tape.
2. When possible, try to keep windscreen panels at a maximum of 60 feet in width. This allows for easier handling and installation.
3. Do NOT round off measurements. Send all measurements in feet and inches.
4. Do NOT assume two fences are the same size. Measure every fence just to be safe.
5. Make all measurements at site when possible rather than from drawings.
6. Make note of each measurement immediately. Do not make multiple measurements before writing them down.
7. Draw a rough sketch of the court to list your measurements. Match your measurements to the appropriate part of the drawing. This allows for a visual decreasing any chance of error.

## FUN FOR ALL AGES AND SKILL LEVELS

**FUNNETS™** are made of a unique blend of materials designed specifically for outdoor use. Our heavy body construction is UV treated and is unbreakable. We know you have seen the imitation PVC plastic goals which are made of tubing designed for plumbing applications. These imitation goals have a very low impact resistance which can cause the piping to break and expose sharp edges.

Our **5 Year Unlimited Warranty** is the best in the industry.  
**DON'T BE FOOLED BY CHEAP IMITATIONS!**

### SPORTSTUFF® ROD

Our engineers searched for the perfect blend of flex/strength ratio. The result was the Sportstuff® rod. A safe, unbreakable rod with UV stabilizers, that lasts a lifetime!

### FUNNETS® FITTINGS

The Funnet® fitting is molded out of ABS plastic with UV stabilizer for long life and strength. The fittings are longer for a more secure fit. Each fitting has set screws which allow the fitting to be tightened securely to the rod.

**EASY TO CARRY AND TRANSPORT**
