

Recycled Playgrounds

BY SUPERIOR RECREATIONAL PRODUCTS

REIMAGINE how *your* children PLAY TODAY

Have you recycled anything lately? You just might be helping us to reimagine play! Our recycled playgrounds are made from reclaimed **post-consumer plastic products** such as milk jugs. Approximately 95% of our recycled playgrounds are made from recycled material, with posts and decks being **100%**. So go ahead and keep recycling. For every 8 milk containers you recycle, we can create **1 pound** of plastic lumber to help children like yours play!

We Use Quality playground materials

At Superior, we only use quality playground materials. **Our playgrounds are proudly made in the USA** and are built to last. Whether you are purchasing a climber or a full structure, we guarantee fun for years to come.

1

We offer the look and feel of wood without the unwanted maintenance.

Our recycled posts and decks look just like wood without the unwanted maintenance. These reinforced posts and decks are vandal resistant, protected from rotting or splitting, and have UV additives to protect them from fading. Additionally, this material is resistant to termites, salt spray, and the elements.

2

Our rotationally-molded plastics have anti-static inhibitors.

Our rotationally-molded plastics, such as those used for slides and tubes, are made of $\frac{3}{8}$ " thick low density polyethylene (LDPE). They are UV stabilized for reduced fading and also contain anti-static inhibitors.

3

Our Superdurable powder coat leaves your structure protected.

Our steel components are primed at the welded areas and coated with 3-5 mils of Superdurable powder coat to protect your playground from fading and rust. Additional extra-protection coating options for regions, such as coastal, are available.

4

Our textured HDPE panels are strong and UV stabilized.

Our $\frac{3}{4}$ " thick textured high density polyethylene is used for products such as our activity panels. With UV stabilization, we ensure your carefully selected color will remain bright and colorful for years to come. These panels are stain and graffiti resistant and will not splinter or crack.

5

Our modular shades block harmful UV rays.

Our shade fabric blocks 91%-99% of harmful UV rays, depending upon the color you've chosen. Our fabric is also flame retardant, with some of our color choices being California Fire Marshal certified.

6

We offer stainless steel hardware, so you won't worry about rust.

99% percent of the hardware we use is stainless steel, with less than 1% being corrosion-resistant coated steel. Our hardware is packaged individually and labeled, allowing for more efficient installation.

What does it mean?

R3 stands for recycled, reliable, and recreation. We seek to create **recycled** playgrounds that not only benefit the environment but also meet the needs of our customers, including their need for a **reliable** playground year after year. Lastly, we seek to create a product that celebrates **recreation** so children 6 months and up can create memories on their local playground.

+
We make it easy to buy and bid all Superior products through organizations like:
HGAC Buy, NASPO ValuePoint, Buy Board

• BUILDING YOUR • Environment

Our mission is to help you play, relax, and live. We help communities create complete outdoor recreational environments that cultivate community, enrich lives, and allow people to focus on what matters most to them. Utilize all of our product lines in your next recreational space.

Specifications & Limited Warranty

Hardware

Hardware is made from stainless steel or corrosion resistant coated steel with the exception of the self-drilling/self-tapping screws and bolts. All hardware has passed an 100 hour salt test. Most hardware is tamper resistant. Conforms to ANSI/ASCE-8-90.

Rotationally-Molded Plastics

Roto-molded plastics are 1st quality LDPE, have a 3/8" wall thickness, static inhibitors and 2,550 PSI tensile strength. Roto-molded plastics are UV stabilized and have a UV 8 rating as tested per ASTM G155 cycle guidelines. Roto-molded plastics adhere to the following ASTM codes: D1238, D4883, D3418, D790 Procedure B, D648, and D1693 Condition A (F50).

Poly Sheet

Our recycled playgrounds feature 3/4" high density HDPE sheeting and are tested in accordance with ASTM D19287 procedure C. HDPE sheeting is textured with a matte finish, is UV stabilized, and has a UL 94 HB fire rating. HDPE sheeting is stain and graffiti resistant and will not delaminate, splinter, or crack. HDPE sheeting adheres to the following ASTM codes: D1505, D1238, D638 Type 4, D746, D790, and E831.

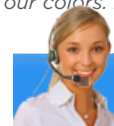

Superdurable Powder Coat

Our Superdurable powder coat is applied with an electrostatic application, baked on at 400°, and is 3-5 mils thick. Our powder coat is lead free, high gloss or semi-gloss, and has a no peel/no flake finish. Our powder coat has good-to-excellent resistance to most solvents, oils, acids, and alkalis. Powder coating adheres to ASTM codes B-117, D-2247, and D-2794.

Warranty

- Lifetime warranty on posts
- 15-year warranty on decking
- 15-year limited warranty on rotationally-molded plastic components when included as part of a complete playground purchase
- 15-year limited warranty on all pipes, rungs, loops, and rails
- 15-year limited warranty on high density polyethylene (HDPE) plastic sheet
- 10-year warranty on shade fabric
- 1-year warranty on moving parts

Colors shown on this page are only representations of our colors. Please ask your representative to see color samples.
